

# THINKING ABOUT A CAREER IN TEACHING?

Apply to join the NETT Internship Programme

nett

## NETT Internship

The NETT Internship Programme is an exclusive development opportunity for undergraduates/graduates looking to develop their skills before applying for formal teacher training.

We deliver a series of training sessions throughout the year to develop knowledge in a range of areas, including behaviour management, assessment, numeracy and literacy, as well as providing opportunities to gain classroom experience, which sometimes leads to employment within our partner schools.

If you are interested in becoming a teacher in a Primary, Secondary or Special school but need further classroom experience and training before you apply - the NETT Internship programme can support you.

If you are you a graduate, a student working towards a degree or a school based employee - the NETT Internship programme could be for you.

We support our interns with finding voluntary placements to fit around study commitments in order to develop classroom experience prior to a formal training application.

We offer a programme of exclusive training and school based experience which leads to a guaranteed interview with NETT.
